1. About Bakerz Bite

1.1 Overview

Bakerz Bite is a bakery website that lets customers explore the full bakery range, choose a delivery or pickup area, build a cart and read about the bakery. It is a responsive website with three pages that works in the leading browsers on desktop, tablet and mobile.

The site presents six product categories: cakes, savory items, cupcakes and pastries, shakes, coffee and customised cakes. It also has bakery merchandise, special offers, customer feedback, an About page with a photo gallery and a Contact page with an FAQ.

1.2 Why Bakerz Bite

Bakerz Bite was built to give a Karachi bakery a place online where customers can find everything in one visit. The main reasons are:

- **Customers search online.** People look for bakeries on their phones. A website lets Bakerz Bite be found and shown at any hour.
- **The whole range in one place.** Cakes, savories, cupcakes and pastries, shakes, coffee, custom cakes and merchandise are all on one page, with price, description and ingredients before anyone orders.
- **Ordering is simple.** Choose Delivery or Pick-Up and your area, pick a quantity, see the total, and check out from the cart.
- **It builds trust.** The About page, photo gallery, customer reviews and FAQ show the bakery and what customers say about it.
- **It works on every device.** The layout adjusts to phones, tablets and computers.
- **Customers can reach the bakery.** The Contact page has a form, phone number, email and address.

1.3 What You Need
